

PRINCIPLES AND PRACTICE OF INTRAVENOUS THERAPY

TABLE OF CONTENTS

Introduction.....	1
Advantages of Intravenous Therapy	3
The Five Rights of Medication Administration	4
Aseptic Technique	5
Reducing Risks of Infection	7
Anaphylactic Shock	8
Emergency Care for Anaphylaxis	10
Antidotes for Reactions to Medications	11
Emergency Equipment	12
Complications of IV Therapy	13
Symptoms of Fluid Deficit and Fluid Excess	17
Fluid Assessment	17
Preventing Complications of IV Therapy	18
Fluids	19
Method for Estimating Osmolarity	21
Selecting Equipment	25
Rates of Administration	27
Calculating Flow Rates	28
Needle Sizes	29
Intramuscular Injections	30
Pre Treatment Assessment	31
The Physician's Order	33
Patient Teaching	34
Selecting A Site	35
Applying The Tourniquet	40
Methods of Venous Distension	41
Caring For Patient Comfort	42
Preparing the Solution	43
Steps in Preparing For Venipuncture	45
Documentation	46
Some Indications For Basic Vitamin Therapy	48
Osmolarity Chart For A Sample Chelation Treatment	49
Protocol Ideas	51
Vitamins	52
Vitamin B2 Riboflavin PH 5.0 to 6.0.....	54
Vitamin B3 Niacin/Niacinamide	56
Vitamin B5 Pantothenic Acid	58
Vitamin B6 Pyridoxine PH 2.0 to 3.8.....	60
Vitamin B12	62
Vitamin C Ascorbic Acid Ph 5.5 to 7.0	63
Folic Acid PH 8.0 to 11.0	65
Calcium Gluconate Ph 6.0 to 8.2	66
Magnesium Sulfate PH 5.5 to 7.0	67
Pamidromate (Aredia) Patient Information	69
Pamidromate (Aredia) Información para el Paciente	71
Permission for Intravenous Aredia Therapy	72

POLICIES

Home Care Infusion Therapy Policy and Procedure75
Home IV Therapy Policy and Procedure76
Home Infusion Nurse Responsibilities Policy and Procedure80
Initiation, Medication, Administration, Monitoring and Discontinuation of IV Therapy81
Infusion Therapy Policy and Procedure82
IV Competency Skills Policy and Procedure83
IV Competency Skills84
Anaphylaxis Protocol Policy and Procedure86
Medication Administration87
Procedure Flushing at Hickman Catheter89
Procedure Heparinization with Cap Change Line90
Procedure Hickman Catheter dressing change91
Triple Lumen CVP Catheters Procedures92
Groshong Catheter Procedures93
Needle Safety and prevention of injury94
TOTAL PARENTERAL NUTRITION - TPN96

PICC LINE PROTOCOL

Maintaining a PICC Line Protocol01
The Management of Complications in relation to PICCS.....02
A mechanical Phlebitis06
Administration of Bolus Urokinase into a blocked PICC12
Procedure for repairing a turn/damaged single lumen PICC16
E.Deep Venous Thrombosis18
F.Catheter Tip malposition20
G.Exit site Infection.....22
H.Allergy to Dressing23
I. Pain24
Nurses Competency25
Management of PICC line (Peripherally Inserted control Catheter)31
Care of your PICC line32
Possible problems Signs and Symptoms to report to the nurse33

Training Record form34
