

TABLE OF CONTENTS

Wound Care Type/Definitions	1
Pressure Ulcer	1
Diabetic Ulcer	2
Stasis Ulcer	3
Burn	3
Trauma	4
Ulcer associated with atherosclerosis due to Diabetes	5
Surgical Wound	5
Procedure for Enzymatic Debriding Ointment	6
A- Application of Enzymatic Debriding ointment	6
B- Removal of Enzymatic ointment and secondary dressing	7
Procedure for Hydrocolloid Dressings	9
A- Placement of Hydrocolloid Dressing	9
B- Removal of Hydrocolloid Dressing	10
Procedure for Hydrogel Dressing	12
A- Placement of Hydrogel Dressing	12
B- Removal of Hydrogel Dressing	13
Procedure for Lyofoam	14
A- Placement of Lyofoam Dressing	15
B- Changing and/or removal of Lyofoam Dressing	16
Procedure for Polymen	17
A- Placement of Polymen Dressing	17
B- Changing and/or Removal of Polymen Dressing	18
Procedure for Wet to Dry Dressing Change	20
A- Placement of Wet to Dry Dressing	20
B- Removal of Wet to Dry Dressing	21
Procedure for Wound Cleanse/Skin Protectant	22
Prevention and Treatment of Decubitus/Wound	24
Procedure for Dressing Change	25
Procedure for Wound/Decubitus Summaries	26
Emergency Care for Wound Infection-Review Tool	27
Discharge to Community needing Wound Care or Medication Assistance	28
Adverse outcome report: Increase in Number of Pressure Ulcers	29
Decline in Wound Status	31
Pressure Ulcer Assessment Chart	32
Photograph Authorization Policy	33
Patient Release of Photograph Form	34
Phases of Wound Healing	35
Ulcer Documentation.	36
Staging Pressure Ulcers.	38
Wound Etiology	39
Infection vs Contamination/Colonization - Exudate	43
Types of Wound Debridement	45
The Vacuum Assisted Closure (VAC) system	47
Addendums (Wound Body Chart, Wound Record Addendum)	52
Training record form	54
Branden Risk Assessment Scale	55
